	Chemistry, Physics, & Biology												
LEVEL H	World History 2												
	Conservation, Robotics, & Technology												
LEVEL I	American History												
	Physics, Electromagnetism, & Waves*												
LEVEL J	History of Science												
	Physics, Electromagnetism, & Waves*												

* Levels I and J share a Science option. Science J must be used with History J. Science I can be used as a stand-alone product or within the Level I All-Subject Package. See page 58 for more details.

**For more information on High School levels, see pages 42 and 51.

2. Choose a Level for Reading with History and/or Science

Individual Students

Use the chart on the left to see which levels may be appropriate for your student's age. For example, if your student is 7 years old you can choose between Levels A, B or C. Then narrow your choice to a level based on the topics you want to study. If you aren't sure which topic to select, we recommend choosing the lower or middle level for your student's age. If you need additional help choosing a level, please call or email us.

Multiple Students

Combine students within a 3-year age range into one level. When choosing a single program for two or more students, we recommend choosing the lowest Level suitable for your oldest student. For example, if you have a 6- and an 8-year-old, you would choose the lowest level suggested for an 8-year-old—Level B. If you have an 8- and a 10-year-old, you would choose the lowest level suggested for a 10-year-old—Level

D. You do not need to worry about your older student being sufficiently challenged. They will experience impactful and lasting connections between the people, places, and events they learn about through vivid stories and engaging discussion.

3. Choose a Level for Remaining Subjects

READERS & LANGUAGE ARTS (LA)

Levels K-4: Readers are included in our Reading with History programs. There are five Reader Levels (K, 1, 2, 3, and 4) available for History A-C, so you can customize according to your student's needs. We offer a Quick Reading Assessment on our Resources page at bookshark.com/about/resources to help you select a Reader level. If you are also using our LA program, we recommend choosing the Level that matches your students ability first, then matching the Reader level to the LA level, regardless of reading ability. For questions or concerns, please don't hesitate to call or email us. We are here to help!

Levels D-H: Starting in Level D, students transition from "learning to read" to "reading to learn." The Readers and Language Arts tie directly to the History content (LA is not a stand-alone product at these levels). To take advantage of this integrated approach, we recommend choosing the Language Arts Level that coordinates with the Reading with History Level. The All-Subject Package automatically coordinates this and is included in the package.

MATH

Choose from our large selection of math programs including *Math-U-See*, *Singapore*, *Saxon* and *RightStart Math*. If you need help selecting a math program, we suggest reviewing the Strengths and Weaknesses comparison on our Resources page at bookshark.com/about/resources. Our Resources page also includes placement tests for all four math programs.

HANDWRITING

Handwriting Without Tears (HWT) is included in our All-Subject Packages for Levels A-D. You can customize your HWT Level or opt out of Handwriting. Higher levels are available for purchase if you want your student to continue practicing handwriting.

SPELLING

Levels K-4: Spelling words are included in the Language Arts guide and are based on the accompanying Readers.

Levels D-G: *Spelling You See* is included in our All-Subject Packages for Levels D-G. You can customize which level your student

needs or opt out if you plan to use another program. If you need help selecting the correct level, see the General Spelling Readiness Guidelines on our Resources page.

We also offer *All About Spelling*, a mastery-based program which can be purchased as an Individual Subject.

Multiple Students

If you are teaching multiple students and purchasing an All-Subject Package, we recommend customizing the package to meet one student's needs and adding additional skill-based subjects for your other student. If your students are using the same math level, you only need to buy additional consumables rather than a whole math package. All packages on our website include a **Consumables or Additional Student** tab so you can see which items you may need to purchase for additional students. All packages include one set of consumables.
